### SKILLS

---

#### React.js

Language: javascript, html/css.

- Frameworks/Libraries: React.js, Bootstrap, Tailwindcss, node.js, Rest Api, Responsive Web Design.
- Tools: Github, postman, vscode, Vercel, Json,
- On-page Seo, Basic knowledge of off-page Seo

### PROJECTS

---

**Attendance Management System, Attendance Management System (MERN Stack)** 🔗

- Developed a full-stack attendance management system with admin and employee panels.
- Implemented secure login authentication and MongoDB for efficient data storage.
- Enabled employees to mark attendance with real-time location capture and accurate check-in/out timings.

- Added functionality for employees to send leave requests and track approval or rejection status.
- Provided admin controls to manage employees, approve/reject leaves, and monitor shift timings.
- Integrated data filtering by employee name, ID, and date range for easy record management.

### **E-commerce website**

- Developed a responsive e-commerce website using HTML, CSS, Tailwind CSS, JavaScript, React.js, Express.js, and MongoDB. Key features include:
- Product Listing and Details: Displayed a catalog of products with detailed information, including images, descriptions, prices, and availability, allowing users to browse and select items easily.
- Add to Cart and Order Placement: Users can add products to the cart and place orders, with order details stored in the database.
- User Authentication: Secure login and registration functionality.
- Search and Filter Functionality: Implemented a search bar for users to quickly find products and added filters to refine results based on categories and price ranges for a more personalized shopping experience.
- Email Notifications: Automated emails sent to users and admin for order confirmations.

### **Organisation Projects**

While working as a Software Engineering Intern, I was involved in several projects, including developing user interfaces, handling website maintenance, and ensuring responsive design. I collaborated effectively with the team as well as worked independently when required. I also contributed to improving page SEO and overall website performance
